DETAILED ACTION

Allowable Subject Matter

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: The applicable prior art does not disclose or reasonably suggest a dispersion compensating fiber which satisfies the elements as expressed in claim 1 herein, particularly a ring offset which does not exceed four microns, and defined ranges for dispersion slope and total dispersion exhibited within the fiber. As claim 1 is the basis of all the presently pending claims (including independent claims 21 and 22), all are allowable, since the prior art fails to teach the essential elements disclosed within claim 1.

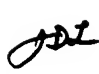

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other dispersion compensating fibers known in the prior art (which operate according to similar parameters of the claimed present invention) can be seen in the cited documents by Sillard et al, Bickham et al, and Jiang et al.

Art Unit: 2874

Sillard describes a dispersion compensating fiber that exhibits a total dispersion that is negative and greater than $-150 \text{ ps}/(\text{nm} \cdot \text{km})$. Sillard does not present grounds for rejection as the presently claimed fiber shows significant refinement in total dispersion values when compared to Sillard. Likewise, Bickham and Jiang both teach a dispersion compensating fiber with a ring-like structure, comprising a core, moat, and outer ring segments. However, details surrounding the value of total dispersion, dispersion slope, κ , relative indexes of refraction, among other variables, of both Bickham's fiber and Jiang's fiber do not closely read on those values set forth in the present invention. Therefore, the present invention is considered to be unique over the prior art.

All of the prior art submitted by the applicant in the Information Disclosure Statements filed on February 6, 2004 and February 25, 200⁵ has been considered and made of record. 

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rhonda S. Peace whose telephone number is (571) 272-8580. The examiner can normally be reached on M-F (8-5).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on (571) 272- 2344.
